

SHARATH M

Address: Government Boys Hostel, Immadihalli Whitefield,
Bengaluru-560066.

Email ID: shm23csds@cmrit.ac.in / sharathmise@cmrit.ac.in

Mobile No: +91 9731276655

LinkedIn Profile: <https://www.linkedin.com/in/sharath-m-67427429a/>

Git-Hub: <https://github.com/SHARATH204-MAX/>

Leetcode: https://leetcode.com/u/sharath_2003/

CAREER OBJECTIVE

AI and Data Science enthusiast with strong knowledge of Python, Machine Learning, Data Annotation, NLP, SQL, Data Preprocessing, and AI-powered applications. Experienced in developing AI-based solutions using Large Language Models (LLMs), Lang Chain, Streamlit. Seeking an AI Data Associate Internship where I can contribute to real-world AI projects while continuously learning and delivering accurate, high-quality data solutions.

EDUCATIONAL QUALIFICATION

- **Bachelor of Engineering in Information Science & Engineering**

CMR Institute of Technology, Bengaluru

CGPA: 8.95, 2027 (Pursuing)

- **Pre-University Course – Science**

SRS Pu College Chitradurga

87%, 2022

- **10th Grade**

Vidya Vikas Vidya Samasthe Chitradurga

95%, 2020

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, TypeScript, JavaScript
- **Core Concepts:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Frontend Technologies:** HTML5, CSS3, JavaScript
- **Backend Technologies:** Fast API, REST APIs, Spring-Boot, Server-Sent Events (SSE), JWT Authentication
- **Tools & Platforms:** Git, GitHub, VS Code, IntelliJ IDEA
- **MLOps & Experiment Tracking:** DVC, MLflow, DagsHub
- **AI & Machine Learning:** Large Language Models (LLMs), NLP, Prompt Engineering, RAG
- **Database:** MySQL, SQLite, PostgreSQL (Supabase), MongoDB
- **DevOps & Cloud:** Docker, GitHub Actions (CI/CD), AWS (EC2, ECR), Render
- **Data Visualization:** Tableau, Power BI

PROJECTS

- **SynapseSQL Enterprise: AI Database Intelligence Platform** | [Live Demo](#) | [GitHub](#)
 - Built a full-stack conversational analytics platform that converts typed or voice questions into SQL using LangChain and Groq-hosted LLMs, grounded on the database's live schema to reduce hallucinated queries.
 - Designed a two-pass LLM pipeline with deterministic SQL generation, a self-healing retries that feeds database errors back to the model, automatic multi-model failover, and a streamed analytical summary over Fast API Server-Sent Events.
 - Implemented layered security: destructive-SQL guardrails, a read-only DB connection, JWT authentication with admin/analyst/viewer RBAC, per-endpoint rate limiting, and Supabase audit logs with row-level security that never store result rows.
 - Developed a React + TypeScript interface with a schema explorer, sortable data grid, interactive charts and CSV/Excel/JSON export, then containerized it with a multi-stage Docker build and deployed it on Render
 - **Tech Stack:** Python, Fast API, React, TypeScript, LangChain, Groq, SQL Alchemy, SQLite, MySQL, Supabase (PostgreSQL), JWT, SSE, Chart.js, Docker, Render

- **FitMe: Fitness App Microservices**

- Built a microservices fitness-tracking platform with an API Gateway, User, Activity and AI Recommendation services, with service discovery through Netflix Eureka and centralized configuration through Spring Cloud Config Server.
- Secured the system with OAuth2/JWT authentication using Keycloak as the identity provider, with Spring Security validating tokens at the gateway before requests reach downstream services.
- Implemented user synchronization between Keycloak and the internal User Service so authenticated users are registered automatically.
- Developed a React + Redux frontend (Vite) with Keycloak-based login, and activity listing, detail and creation pages that call backend APIs through the gateway.
- **Tech stack:** Java 23, Spring Boot 3.4.3, Spring Cloud (Gateway, Config Server, Eureka), Spring Security (OAuth2 Resource Server), Spring Data, Keycloak, JWT, React, Redux, Vite, Maven, Docker.

- **Kidney Disease Classification: Deep Learning Service | [GitHub](#)**

- Built a VGG16 transfer-learning classifier (ImageNet weights, custom head) to label kidney CT scans as Normal or Tumor on a 7,360-image dataset, reaching **88% validation accuracy**, using augmentation, early stopping, learning-rate scheduling and best-model checkpointing.
- Designed a reproducible ML pipeline with DVC (data ingestion, base model, training, evaluation) and a typed YAML configuration layer, with MLflow/DagsHub tracking of parameters and metrics across experiments.
- Debugged training and evaluation issues, including a diverged learning rate that collapsed the model to the majority class, train/inference preprocessing mismatches, and a validation-split leak, to get reliable metrics.
- Deployed a Flask REST API with a drag-and-drop web UI for real-time predictions, containerized with Docker, with a GitHub Actions workflow that builds the image, pushes it to Amazon ECR and deploys to EC2.
- **Tech Stack:** Python, TensorFlow/Keras, VGG16, Flask, DVC, MLflow, DagsHub, Docker, GitHub Actions, AWS (ECR, EC2), NumPy, Pillow

CO-CURRICULAR & EXTRA CURRICULAR ACTIVITIES

- **Certifications**

- Completed a course on topic “Data Structures and Algorithm” from Code Help
- Completed a course on topic “Complete Generative AI Course with Lang chain and Hugging face

- **Hackathons**

- Participated in Rapid Innovation Challenge organized by IEEE Young Professionals Board

- **Technical club activities**

- Participated the CCA club activities which include the events on aptitude and placement related contents and more.

- **Sports**

- Represented the CMRIT in the VTU level KHO-KHO match for twice.
- Active Kabaddi player, Active athlete in 400m, 800m.

- **Additional responsibilities**

- Event organization and volunteer roles in college fests and NSS/NCC activities.

AWARDS & ACHIEVEMENTS

- Awarded Best Mini Project During 1 Sem for the project “Accident detection System in Bikes”.
- Awarded the Rajya Puraskar from Bharat Scouts and Guides.

PERSONAL DETAILS

Date of Birth	: 11 TH August 2003
Gender	: Male
Nationality	: Indian
Permanent Address	: Near Sri Hatty Maramma Temple, Burujanahatty, Chitradurga
Languages Known	: English, Kannada, Hindi
Hobbies	: Reading Books, Traveling
